Journal of the Operational Research Society

INDEX TO VOLUME 40
1989

Please note that pages marked * refer to Vol. 40, Number 9, September 1989—not to the August issue. Owing to an error in production, the pagination does not follow sequentially between August and September.

JOURNAL OF THE OPERATIONAL RESEARCH SOCIETY

World List Contraction: *J. Opl Res. Soc.*

Editor: JOHN HOUGH

Editorial Policy: The *Journal* is published 12 times a year on behalf of the Operational Research Society. It is the aim of the *Journal* to present papers which are relevant to practitioners, researchers, teachers, students and consumers of operational research, and which cover the theory, practice, history or methodology of OR. However, since OR is primarily an applied science, it is a major objective of the *Journal* to attract and publish accounts of good, practical case studies. Consequently, papers illustrating applications of OR to real problems are especially welcome.

Editorial Office: Operational Research Society Publications Unit, Neville House, Waterloo Street, Birmingham B2 5TX. *Telephone:* 021-643 0236. *Fax:* 021-631 3485.

Editorial Assistant: DEBORAH J. RALPH

Publications Manager: RICHARD SPRAGG

Items for publication should be prepared in accordance with the requirements printed at the back of this issue, and three copies sent to the Editorial Office.

Books for review should be sent to: R. W. Eglese and M. Pidd, Department of Operational Research, University of Lancaster, Bailrigg, Lancaster LA1 4YX. *Telephone:* 0524 65201, exts 4388 and 4378.

Communications regarding *International Abstracts in Operations Research* should be sent to: Dr D. K. Smith, Department of Mathematical Statistics and Operational Research, University of Exeter, Exeter EX4 4PU. *Telephone:* 0392 263263, ext. 4478.

The *Journal* is published monthly, on behalf of the Operational Research Society, by the Scientific and Medical Division, The Macmillan Press Ltd, Houndmills, Basingstoke, Hampshire RG21 2XS. *Telephone:* 0256 29242. *Fax:* 0256 842754.

All rights of reproduction are reserved in respect of all papers, articles, illustrations, etc. published in this journal in all countries of the world.

The photocopying of *Journal* material is permissible only for teaching (i.e. non-commercial) purposes, and anyone wishing to do so must seek permission, in writing, from the Editor.

Authorization to photocopy items for internal or personal use, or for the internal or personal use of specific clients, is granted by The Macmillan Press Ltd for libraries and other users registered with the Copyright Clearance Centre (CCC) Transactional Reporting Service, provided that the base fee of $3.50 per copy is paid directly to CCC, 27 Congress Street, Salem, MA 01970, USA. 0160-5682/90 $3.50 + 0.00.

Annual subscription: worldwide £255/US$459 (Sterling rate is definitive), or equivalent in any other currency. Individual subscription for those whose institutions already subscribe at the full rate: £76.00. Orders must be accompanied by remittance. Cheques should be made payable to *Macmillan Press* and sent to: The Macmillan Press Ltd, Subscription Department, Brunel Road, Houndmills, Basingstoke, RG21 2XS, UK. Where appropriate, subscribers may make payments into UK Post Office Giro Account No. 519 2455. Full details must accompany the payment. Second class postage permit USPS 689-430.

Postmaster, please send address corrections to: Journal of the Operational Research Society, c/o Mercury Airfreight International Ltd. Inc. 2323 Randolph Avenue, Avenel, Rahway, New Jersey, NJ 07001, USA.

Enquiries concerning advertising space or rates should be addressed to: Michael Rowley, Advertisement Manager, Macmillan, 4 Little Essex Street, London WC2R 3LP, UK. Telephone: 071 836 6633; Fax: 071 379 4204.

JOURNAL OF THE OPERATIONAL RESEARCH SOCIETY

INFORMATION FOR CONTRIBUTORS

Authors should send to the Editorial Office FOUR copies of their paper, which should conform to the following requirements.

Script Requirements

1. Manuscripts should be typed on one side of the paper, in double spacing, with ample margins. The pages should be numbered consecutively, with added pages numbered 1(a), 1(b), etc.

2. Papers should not normally exceed 10 *Journal* pages (or about 5000 words). Each figure is equivalent to about one-third of a page, and hence manuscripts should not exceed 20 typed, double-spaced A4 pages, including figures, tables, references and appendices. Technical notes, letters and viewpoints should not exceed six manuscript pages.

3. Illustrations, photographs, tables, etc. should accompany the script on separate sheets and take account of the page size of the *Journal*. Wherever possible, figures should be drawn in Indian ink for direct reproduction. Figure captions and table headings should be provided on a separate page at the end of the script.

4. A running head of not more than 30 characters should be supplied for papers with long titles.

5. Sections and subsections should be clearly differentiated but should not be numbered.

6. Papers should be written without the use of footnotes.

7. Mathematical expressions and Greek or other symbols should be written clearly with ample spacing. Use widely accepted symbols and abbreviations, following the style of BS 1991 Part 2 1954.

8. Spelling should conform with *The Concise Oxford Dictionary*.

9. References should be indicated in the text by a raised figure (unbracketed) and should run in numerical order. They should be listed in order of citation (not alphabetically) at the end of the article, and should include: all authors' names, followed by the date of publication; for papers, the title, the name of the journal, the volume number and the first and last page numbers; for books, the title, the publisher and the place of publication.

Please adopt the following style:

Journals (abbreviate titles as in the *World List of Scientific Periodicals*):

1. C. Roberts and B. Dangerfield (1990) Modelling the epidemiological consequences of HIV infection and AIDS: a contribution from operational research. *J. Opl Res. Soc.* **41**, 273–289.

Books:

2. S. Nahmias (1988) *Production and Operations Analysis*. Richard D. Irwin, Homewood, Illinois.

Papers in a contributed volume:

3. V. Belton (1990) Multiple criteria decision analysis—practically the only way to choose. In *Operational Research Tutorial Papers 1990* (L. C. Hendry and R. W. Eglese, Eds.), pp. 53–101. Operational Research Society, Birmingham.

Conference papers:

4. J. C. Ranyard (1990) OR support for British Coal's recovery. Presented at the *12th. Triennial Conference on Operations Research*, Athens, Greece, June 1990.

Unpublished reports and theses (which should be available on request):

5. E. J. Onyewuenyi (1990) A descriptive framework for Third World development projects with particular reference to actual and potential Management Science/Operational Research involvement. Ph.D. Thesis, Lancaster University.

Content

10. At the head of each paper there should be an **abstract** of not more than 150 words, followed by a selection of **key words** defining the essential content of the paper. The abstract should be sufficiently comprehensible to enable any reader of the *Journal* to judge the paper's potential interest. Since this abstract will be published in *International Abstracts in Operations Research*, it should be complete in itself and contain no references. A list of key words is given overleaf.

11. All theoretical papers should commence with an **introduction** which is comprehensible to non-specialist readers.

12. Where appropriate, **worked examples** should be included in theoretical papers to assist the understanding of non-specialist readers.

13. All case-study papers should commence with an **introduction** which indicates clearly that this is an account of an actual project.

14. All papers should end with a **conclusion** which summarizes the value of the work and, where appropriate, indicates possible directions for future developments.

15. Wherever possible, theorems, computer programs, lists and calculations should be placed in **appendices**.

Proofs, Copyright and Conditions of Submission

16. Proofs of papers are sent to authors for checking and correction of fact, especially with regard to mathematical content. Alterations to diagrams and non-essential textual changes should be avoided. Proofs must be returned within 48 hours of receipt. Failure to do so may result in the paper being published with editorial corrections only.

17. Twenty-five reprints of each paper are provided free to the author, and further reprints and copies of the issue (at a specially reduced rate) may be ordered when proofs are returned. However, it is not possible to supply reprints of letters and viewpoints.

18. The copyright of all material published in the *Journal* is held by the Operational Research Society.

19. Submission of a paper for refereeing means that the author certifies that the manuscript is not copyrighted; nor has it been accepted for publication (or published) by any refereed journal; nor is it being refereed elsewhere at the same time. Submission of a paper to more than one journal simultaneously is unacceptable both to the Editor of JORS and to the editors of other journals in the field of OR.

20. If material has been published elsewhere, authors must obtain the consent of the earlier publisher. Authors wishing to use material from the *Journal* should consult the Editor.
